Vickie, could you get these comments into the proper people based upon the informal conference held in Alton on Monday of this week. I understand we have until Friday to add any additional comments and I would like to share the following in addition to the comments I made on Monday.

I have great concern about the access road into the mining area, meaning I understand the Alton Coal Company has made commitments to some that they will not bring the coal trucks through the town of Alton and are planning to build an access road around the town of Alton. I would like to see Alton Coal Company plan of the access road around the town of Alton commitment in writing and part of the permitting process.

I am very concerned about a statement made by the Alton Coal company during the Monday meeting. It was stated that some of the coal may be sold to out side US interests. I would like to see if it is possible to tie the Alton Coal company to selling their coal only to US vendors and be part once again to the permitting process.

Also, I do not know the truth or possibility of comments made by some on possible pollutants that could enter our area. Our drinking water is all open springs, is there any possibility that our springs could be polluted by this mining activity, if so, will there be measure in place to insure the safety and continued supply of safe drinking water to the people of Alton and at who's cost?

Thanks, Brent Judd Resident of the Town of Alton.
